

Spry Spearmint Oral Rinse Ingredients

	<p>Purified Water Purified through reverse osmosis and is used as a carrier and solvent.</p>
	<p>Xylitol Sourced from non-GMO corncobs and stalks and is used as a natural sweetener, a moisturiser, and for its anti-adhesive effect on bacteria.</p>
	<p>Ethanol (Grain Alcohol) Sourced from non-GMO grains and is used as a preservative.</p>
	<p>Natural Spearmint Flavour Sourced from natural spearmint leaves and is used to infuse a pure, refreshing flavour.</p>
	<p>Vegetable Glycerin Sourced from non-GMO date palm fruit and is used as an emulsifier, texture enhancer, carrier, and solvent.</p>
	<p>Cassia Extract Sourced from the inner bark of Asian Cassia trees and added for its antibacterial and antifungal properties.</p>
	<p>Calcium Glycerophosphate Sourced from a mineral deposit and is used as mineral supplement for remineralisation. It protects the enamel in teeth and balances the pH.</p>
	<p>Aloe Vera Sourced from natural Aloe Vera plants and is used to promote healing and soothe irritated tissues.</p>
	<p>Calendula officinalis (Marigold) flower extract Sourced from the Marigold flower and is used to promote healing.</p>
	<p>Chamomilla recutita extract Sourced from plants and is used for its mild anti-inflammatory actions.</p>
	<p>Echinacea purpurea extract Sourced from plants and is used for its mild immunostimulant actions.</p>
	<p>Oleo europea (Olive) leaf extract Sourced from olive leaves and is used for its anti-viral properties.</p>
	<p>Thymus vulgaris (Thyme) extract Sourced from the Thyme plant and is used for its anti-microbial properties.</p>
